

SMART Education Exchange (SEE) works with Departments of Education, Educational Institutions, School Districts, and School Safety Officials, First Responders, Government Agencies and Non-Government Agencies, and Safety & Security Professionals - to provide School Safety Plan implementation workshops for state mandates.

Since 2015, SEE has successfully implemented SMART Safety & Security (S3) in Educational Institutions. The S3 is a Private Public Partnership (P3), originally developed in partnership with 100 Schools, 2500 Educators, 40.000 Students, and leading Technology and Safety & Security companies and professionals.

Leveraging Partnerships to Advance Safety Culture

We are unique in that we engage local public and private stakeholders in S3 program to improve safety in U.S. schools and communities.

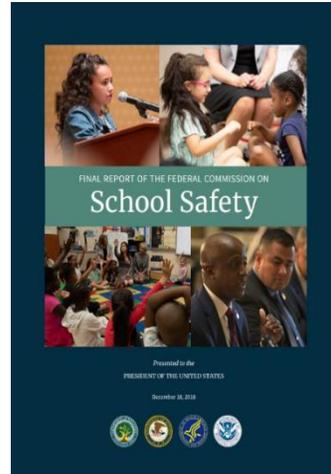

Feasibility Studies, Pilots, Implementation Projects

Feasibility studies provide the S3 stakeholders the comprehensive analysis required for the state mandates, requirements, implementation and financing. The S3 implementation workshops and pilot projects allow for the testing and then scaling, and demonstration of the S3 program in the local school and community setting.

Challenge

States have new local mandates for the School Safety. Many School Administrators and School Safety Officers are unsure how to effectively create, implement and manage the School Safety Plans and Staff Training.

SMART Safety & Security (S3) for Schools USA S3 Implementation Workshops 2019 - 20

“SEE provides School Administrators and School Safety Officers access to a time-tested award-winning digital tool - for fast, easy, affordable Assessment and Implementation and management of local School Safety Plans and Staff Training”

Our priority is “Information to Implementation - today”

Because the S3 Workshop is about Safety & Security, the events are always by invitation only - [registration required](#)

Workshop Details

- Introduction to S3 for Schools
- Includes S3 School Safety Plan Workbook
- Safety Grants for Schools
